THE PRESIDENT OF IOJT

As president of the International Organization for Judicial Training (IOJT) I am delighted to welcome you to the 6th International Conference in Washington, D.C. The IOJT was created in 2002 in a conference held in Jerusalem, in order to promote the rule of law by supporting the work of judicial training institutes around the world. IOJT facilitates cooperation and the exchange of information and knowledge among its member-institutes. IOJT has to date 107 members from 66 countries. Since 2002, four successful conferences have been held: Ottawa (2004); Barcelona (2007); Sydney (2009); and Bordeaux (2011). I am certain that this conference in Washington, D.C., will be another excellent opportunity to learn from one another, to share innovative approaches, and to strengthen the network of judicial educators, experts, and other leaders in the field. I look forward to a stimulating and wonderful conference.

Eliezer Rivlin, IOJT President

Inspired by the judicial settlement process set out in the Québec Civil Code of Procedure, this model teaches a six-step process using a variety of innovative techniques. After being presented with both the model and the six-step process, participants will role play some of the teaching techniques and explore further ways to effectively enhance judges’ skills in dispute resolution.

• Edith Van Den Broeck, Director, Judicial Training Institute, Belgium
• Honorable Marilyn Warren AC, Chief Justice, Supreme Court of Victoria and Chair, Judicial College of Victoria, Australia

Description: From different perspectives each of the speakers will outline the importance of a strategic vision and engagement for judicial education, as follows:

BELGIUM

There is a shift in needs currently taking place in the Belgian Judicial landscape. The Strategic Vision for the Training of the Judiciary is a document that was drawn up in 2013 and which has been edited in the context of a “needs analysis.” This document describes the challenges of the Belgian judicial system regarding training and what role the Training Institute plays in tackling them. The session addresses the following questions: What are the needs of a modern judicial system? What challenges will the judicial system be faced with in the near future? What is the added value of the Training Institute to meet these future demands and overcome the challenges?

AUSTRALIA

Since 2002, the Judicial College of Victoria (JCV) has provided education for judges, magistrates and tribunal members in Victoria, Australia. Insights will be presented from a judicial perspective on innovative aspects of the JCV’s work. Key experiences in the organization’s strategy and development will be the focus, including: foundational work and transition from, in the beginning, initial skepticism about the need for judicial education to, a decade later, institutional acceptance; judge-led curriculum design and education and its relationship to systemic learning and intervention; the challenge of ongoing innovation and judicial engagement; and the JCV’s unique strategic vision for the future, with a move to a tertiary or “academic” model of judicial education.

Session 2.3: Bench Books and Reference Manuals: Preparing Practical Publications for Judges
Regency A

• Sylvan Sobel, Director, Communications Policy & Design Office, Federal Judicial Center, USA — Chair
• Livingston Arnytage, Ph.D., Director, Centre for Judicial Studies, Australia
• Honorable Ljiljana Lulovčić, Judge, Court of Bosnia and Herzegovina, Bosnia and Herzegovina

Description: Publications are the most basic and accessible form of distance education. This session will describe different types of written judicial education resources, including procedural manuals that serve as a reference tool for first instance judges (sometimes called benchbooks) and monographs that provide an overview of specific areas of law. Some benchbooks include process-oriented checklists for judges, others have sample forms, and, in recent years, judicial training institutes have developed e-books with links to legislation and case law. This panel will also use case studies to illustrate the publication development process, from appointing an advisory group, to selecting authors, developing a production timeline, and peer review.

Session 2.4: Justice Administration: International Framework for Judicial Excellence
Regency D

Speakers:
• Dan Hall, Vice President, Court Consulting Services, National Center for State Courts, USA — Chair
• Victor M. Castro Borbon, Chief, Office of the Secretary of Public Administration, Mexico
• Honorable Colin Doherty, Judge, District Court, New Zealand
• Honorable Jan-Marie Doogue, Chief Judge, District Court, New Zealand
• Gregory Reinhardt, Executive Director, Australasian Institute of Judicial Administration, Australia

Description: The International Framework for Court Excellence was developed by an International Consortium consisting of groups and organizations from Europe, Asia, Australia, and the United States. The goal of the Consortium’s effort has been the development of a framework of values,
concepts, and tools by which courts worldwide can voluntarily assess and improve the quality of justice and court administration they deliver. The Framework is a resource for assessing a court’s performance against seven detailed areas of court excellence and provides clear guidance for courts intending to improve their performance. Participants will learn how the Framework can be used to help judges improve the administration of justice.

**Session 2.5: Findings of the International Survey Regarding the Criteria Employed by Various Nations for the Selection of Judges**

**Speaker:**
- Baruch Nevo, Professor, University of Haifa, Israel — Chair

**Description:** Countries around the globe are choosing their judges according to an aprioric known set of criteria. These sets of criteria reflect the philosophical, anthropological, and practical contexts within which the legal systems in the various countries operate. Theoretically, there are many selection methods available. Some are called “preliminary” or “screening” devices and they are rough and rapid by their nature. Others are more subtle and continuous and they allow for more fine-tuning of personnel selection. During the period October 2012–March 2013, a questionnaire was sent through the internet to all IOJT members. The questionnaire consisted of two parts: * Preliminary requirements, (e.g. Higher education degree in law; Age limit) * Selection variables, (e.g. Bar Examination Score). Each part included several basic items, each item dedicated to one selection criterion. The aim of the survey was to collect comparative data regarding the ways nations choose their judges. The presentation will report on the major findings of the 2012–2013 survey. The emphasis will be on selection criteria common to all nations.

LIVINGSTON ARMYTAGE, AUSTRALIA

Dr. Livingston ARMYTAGE is a specialist in judicial education and justice reform, advising governments, courts and international development agencies on improving justice systems. He has worked for major development agencies in more than 30 countries, from Afghanistan and Azerbaijan to Haiti, Palestine, Pakistan, and Papua New Guinea. Livingston is author of the monograph Educating Judges (Kluwer/Brill 1996). His publications include Searching for Success in Judicial Reform (OUP, 2009), and Reforming Justice: a journey to fairness in Asia (CUP, 2012), in which he argues that justice is fundamental to human well being and development. Over the past 50 years, development agencies have spent billions of dollars supporting legal and judicial reforms around the world. Official development assistance — foreign aid — has grappled with the challenges of improving “the rule of law” through improving economic growth and good governance. But the results have usually been underwhelming. Livingston calls for justice to be positioned more centrally in evolving notions of equitable development. Building on new evidence from Asia, he argues that there is an imperative to realign these reforms to promote justice as fairness or equity. Fairness is attained through the enablement of rights, which embody the norms of civic wellbeing, whether vested in international, domestic, or customary law. Livingston is Visiting Fellow at the Lauterpacht Centre of International Law, University of Cambridge, and the founding Director of the Centre for Judicial Studies www.educatingjudges.com.

AMADY BA, SENEGAL

In 1985 he became a Judge, completing his training within the French National School for the Judiciary (ENM) and French courts. He has served as President of the District Court, Judge within the Regional Court of Dakar, and President of Chamber at the Court of Appeal. During the same time, he has been very active as a judicial trainer and became Director of the National Centre for Judicial Training of Senegal in 1997. He was seconded within the International Development Law Organization as Program Manager in 2002, before being appointed as head of the Department of Francophonie in January 2005. Since 2008, he has served as head of International Cooperation within the Bureau of the Prosecutor of the International Criminal Court. As a Senior Adviser on international cooperation and external relations, he is responsible for developing and maintaining the Office of the Prosecutor’s network on judicial cooperation with States, the UN, international and regional organizations, judiciaries’ institutions, civil society, and the academic community. Justice Ba continues to be actively involved in promoting legal education and international cooperation and has spearheaded several initiatives at the International Criminal Court to provide regional training on international criminal law to judicial personnel and ministry of justice officials.
